## A: Methodology of the 2014 IDI Global Survey

### *Data Collection, collation and analysis*

*Mode:* Based on the objectives of the survey, the survey questionnaire was determined as the most appropriate tool. Most of the questions were ‘Closed Questions’ so as to facilitate standardized data collection. The response scales for the questions were attempted so as to collect ordered multiple choice responses. However, some questions by their nature involved descriptive responses. The questionnaires were administered in five languages English, Arabic, French, Spanish and Russian. The survey questionnaire templates are presented in the Annexes C&D.

Separate questionnaires regarding SAIs and the INTOSAI Regional and Sub Regional Secretariats were developed by the Secretariat. Both questionnaires contain an introduction with key terms, guidance material, contact information, and a number of thematic chapters. The table below contains information on the structure of the two questionnaires.

*The Survey Population:* As the survey also served as a follow up on the 2010 Stocktaking survey, the same population including all SAIs and the INTOSAI regions were considered.

*Tool:* The Survey was conducted using a web-based online survey tool: Lime Survey. This tool will facilitates proper data collection, collation and export. Option was provided to respondents to send in their data manually in case the online tool was inaccessible for them. However, data from all such manual responses was also entered into Lime Survey before attempting data collation. The manual option involved filling up the questionnaire responses in MD-Word survey templates for facilitating ease of handling.

*Addressing Non-response:* Potential non response was countered through

1. Valuable follow up support from the INTOSAI regions and AFROSAI-E & CREFIAF
2. Advance information about the survey
3. Appropriate drafting of questions
4. Providing time for follow up in the administration schedule

*Data Standardisation:* Given the regional and cultural diversity across the respondents,<sup>1</sup> there was some need for data standardization. Two general approaches for harmonizing were identified: input harmonization and output harmonization. This survey relied on input standardization, which aims to achieve standardized measurement processes and methods in all national or regional populations. Comparability was realized through standardization of definitions, indicators, classifications, and technical requirements. The need for data standardisation was also limited owing to the use of ordered multiple choice responses.

*Data Processing:* Standardised data was collated, consolidated and analysed to draw conclusions about the different parameters undertaken for the study. Data analysis was facilitated using MS-Excel and SPSS<sup>2</sup>.

<sup>2</sup> SPSS Statistics is a software package used for statistical analysis. Long produced by SPSS Inc., it was acquired by IBM in 2009. The current versions (2014) are officially named IBM SPSS Statistics.

## C: 2013 Global Survey: SAIs

1. Name of SAI	
2. Country	
3. Region <sup>3</sup>	
4. Name and title of person responding	
5. Contact telephone number and email address	
6. Name and title of person giving management approval	

### *Guidance note*

#### *Timeline*

This triennial survey is launched to provide a baseline for measurement of successful implementation of the IDI Strategic Plan, to follow-up on the first global stocktaking of the SAI community in 2010, to ascertain global and regional demand for capacity development initiatives, and to collect data for future research purposes.

Please provide your response by **20 February 2014**, either by filling in the word-document or by responding in the online version.

Responses will be handled confidentially, and the results will be presented on an aggregate level. All respondents will receive a copy of the Global Survey Report when it is completed in June 2014. The report will also be presented to the IDI Board and the INTOSAI-Donor Steering Committee, and made publicly available on the IDI's website and through other IDI and INTOSAI communication tools.

### *General Guidance: How to fill in this questionnaire*

The numbering follows the online survey tool, *limesurvey*.

When you prepare your answers for the questionnaire, please provide us with the contact information of the person filling in the form, so we can get in contact if we have any follow up questions. Please also make sure that you get the approval from your management that the answers are not personal views but officially from your institution.

<sup>3 3</sup> For the purpose of this survey, the term region refers to all INTOSAI regions and AFROSAI-E and CREFIAF.

### Contacts

To help you interpret the questions as we intended, below we have provided guidance on some of the specific questions we ask in this survey. If you require further information or assistance, please contact:

- **Dr. Meike Pätzold**, E-mail: [meike.patzold@idi.no](mailto:meike.patzold@idi.no), Phone: +47 21 54 08 26 / +47 90 70 82 30 (English and French)

### Key terms

**Support services:** E.g. human resources, registry, building- and cleaning services, IT services, training function, accounts, information.

**Capacity development:** The process by which SAIs develop, enhance and organise their systems, resources and knowledge; all reflected in their capacity to perform functions, solve problems and achieve objectives. Capacity Development Support can be provided in the framework of a national program, a bilateral agreement etc, and not always with a pre-defined budget, a funding source or even a timeframe.

**Community of Practice: knowledge network of** participants, mentors, experts, and representatives of SAIs and regional bodies

**Development Action Plan:** Sets out how the Strategic Plan will be implemented. Indicates who will do what when. Concerned with development of the organization, rather than with the annual plan of audit work to be carried out.

**Funding source:** Refers to whether the project/programme is funded by SAI's own budget and/or is donor funded (if donor funded, include name of donors and funding modality: e.g. bilateral funding, pooled funding or budget support).

**Impact:** Refers to the changes at organizational or broader level that can be attributed to a particular project/program or policy, both intended and unintended. E.g. increased audit coverage, increased number of

audit reports produced, improved quality and timeliness of audit reports, improved Parliamentary follow up of audit reports.

**Implementing partner:** Organization(s) supporting and executing the implementation of programs/projects based on agreements concluded by the interested parties. E.g. other SAIs, IDI, private audit firms.

**Parastatal companies/agencies:** A company/agency owned or controlled wholly or partly by the Government.

**Project activity:** Refers to activities within a support category. For example on the job training, developing new SAI legislation, improving IT infrastructure, carrying out a peer review.

**SAI PMF:** Supreme Audit Institutions Performance Measurement Framework. The Pilot Version of SAI PMF is available on <http://www.idi.no/Filnedlasting.aspx?Mid1=102&FilId=849>.

**Strategic Plan:** Consist of a vision, mission and values statement that establishes the strategic direction of the SAI, and determines strategic goals and objectives on how the SAI intends to achieve and consolidate its vision and fulfil its mission.

**Sustainability:** Refers to the ability of a project/program to maintain an acceptable level of benefit flows through its economic life. E.g. SAI ownership to project/programme, projects/programmes being needs based, relevance in terms of consistency with national priorities and policies.

**Timeframe:** Time interval, from (year, month) – to (year, month).

### *Specific Guidance on selected questions*

#### 10. Audit coverage

The benchmarks are taken from the Supreme Audit Institutions Performance Measurement Framework (SAI PMF), and the number required for scoring a 3 on the relevant dimension of the indicator.

**a) Financial audit:** Regardless of who undertakes the audits, SAIs should ensure that all financial statements submitted to the SAI for audit and within its mandate (i.e. excluding requests for additional audits outside the SAI's mandate and resources) are audited within any relevant statutory timeframes. (*Ref. SAI PMF Pilot Version, SAI-1: Financial Audit Results*)

**b) Compliance audit:** To provide a basis for accountability and an expectation of continual oversight within each audited entity, SAIs should ensure that every year all audited entities within their mandate face the possibility of being subject to a compliance audit with suitable scope, covering activities since the previous audit. Many SAIs lack the resources and internal capacity to undertake compliance audit of each audited entity every year. In these cases, SAIs should plan their audits so that each year all audited entities face the possibility that their activities will be audited; the majority (weighted by value<sup>4</sup>) of the audited entities are actually audited; and a sample of the remainder of the audited entities are selected

---

<sup>4</sup> The precise calculation may depend on data availability in the country. Where possible, an appropriate measure of value for each audited entity should be used, such as: expenditure, revenue, or assets/liabilities under management. The basis for calculation should be stated to ensure measurement consistency over time.

for audit following a documented risk basis. (*Ref. SAI PMF Pilot Version, SAI SAI-2: Compliance Audit Results*)

**c) Performance audit:** The SAI has set priorities for performance auditing based on the notion that economy, efficiency and effectiveness are audit objectives of equal importance to the legality and regularity of financial management and accounting, *ISSAI 1:4 (Ref. SAI PMF Pilot Version, SAI-3: Performance Audit Results)*

For the Pilot Version of SAI PMF, please see: <http://www.idi.no/Filnedlasting.aspx?MId1=102&FilId=849>

#### 14., 15., 16. Staffing

Here we would like to know the human resources of the SAI. To make sure we have a comparable number across SAIs, we ask for Full-time equivalent (FTE) which is a unit equivalent to one employee working full-time. (for example, if you have two employees working 50 %, the two employees equal 1 FTE).

We are also interested in knowing how much of the total workforce who is professional audit staff and how much is support staff. (Please make sure the sum of these two subcategories equals the total number of staff in FTE.)

#### 17. Annual budget

Budget figures on mandated and audited entities may not be readily available to many SAIs due to complex country structures or the way budget systems are set up. We would in any case ask you to provide the information that you are able to obtain and explain the limitations as necessary.

#### 22.-26. Budget allocation and right to appeal

SAIs have to be independent in the organization and management of their offices in order to fulfill their mandate effectively. SAIs should also have available necessary and reasonable resources and should manage their own budgets without interference or control from government and its authorities. More guidance on this topic can be found in ISSAIs 1 and 10 and the SAI PMF.<sup>5</sup>

#### Audit Standards

According to ISSAI 100, The Fundamental Auditing Principles form the core of the General Auditing Guidelines at level 4 of the ISSAI framework. The principles can be used to establish authoritative standards in three ways:

- as a basis on which SAIs can develop standards;
- as a basis for the adoption of consistent national standards;
- as a basis for adoption of the General Auditing Guidelines as standards.

---

<sup>5</sup> ISSAI 1 Lima Declaration and ISSAI 10 Mexico Declaration on SAI Independence, SAI Performance Measurement Framework(SAI PMF), SAI-6: Independence of the SAI

SAIs may choose to compile a single standard-setting document, a series of such documents or a combination of standard-setting and other authoritative documents. SAIs should declare which standards they apply when conducting audits, and this declaration should be accessible to users of the SAI’s reports. *ISSAI 100/8*

We realize that many SAIs have just starting implementing the ISSAIs in their organization, and can find these questions hard to answer. We would in any case appreciate as much information as you can give us on this topic, so we can follow this over time in our triennial survey.

**Audit Reports**

36. The SAI’s annual report is its single most important and visible external product, shaping the perception and reputation of the SAI with its external stakeholders. It brings together a summary of its audit activities, major findings and impact of the SAI; a review of the SAIs performance; and an audited statement of its financial activities. It should be submitted, without interference and in a timely manner, to the Legislature or another public body to which the SAI reports.

What constitutes timely may vary between countries; usually it is specified in the legal framework of the SAI. We would like to know what the stipulated legal time limit is for submitting the annual report to Parliament for your SAI, and if the latest annual report was submitted within this time limit.

38. The audit reports in this question refer to all the financial/compliance/performance/other audit reports that the SAI produced the past year.

46. Is your country on the OECD – DAC List?

The DAC (Development Assistance Committee of the OECD) List of ODA Recipients 2012-2013 shows the countries and territories eligible to receive official development assistance (ODA). These consist of all low- and middle-income countries based on gross national income (GNI) per capita as published by the World Bank, with the exception of G8 members, European Union (EU) members and countries with a firm accession date for entry into the EU. The list also includes all of the Least Developed Countries (LDCs) as defined by the United Nations (UN).

## D: 2013 Global Survey : Regions

1. Name of Region <sup>12</sup>	
2. Name and title of person responding	
3. Contact telephone	
4. Contact Email	
5. Name and title of person giving management approval	

### *Guidance note*

#### *Timeline*

This triennial survey is launched to provide a baseline for measurement of successful implementation of the IDI Strategic Plan, to follow-up on the first global stocktaking of the SAI community in 2010, to ascertain global and regional demand for capacity development initiatives, and to collect data for future research purposes.

Please provide your response by **20 February 2014**, either by filling in the word-document or by responding in the online version.

All respondents will receive a copy of the Global Survey Report when it is completed in June 2014 for their beneficial use. The report will also be presented to the IDI Board and the INTOSAI-Donor Steering Committee, and made publicly available on the IDI's website and through other IDI and INTOSAI communication tools.

### *General Guidance: How to fill in this questionnaire*

The numbering follows the online survey tool, *limesurvey*.

When you prepare your answers for the questionnaire, please provide us with the contact information of the person filling in the form, so we can get in contact if we have any follow up questions. Please also make sure that you get the approval from your management that the answers are not personal views but officially from your institution.

---

<sup>12</sup> For the purpose of this survey, the term region refers to all INTOSAI regions and AFROSAI-E and CREFIAF.

### Contacts

To help you interpret the questions as we intended, below we have provided guidance on some of the specific questions we ask in this survey. If you require further information or assistance, please contact:

- **Dr. Meike Pätzold**, E-mail: [meike.patzold@idi.no](mailto:meike.patzold@idi.no), Phone: +47 21 54 08 26 / +47 90 70 82 30 (English and French)

### Key terms

**Capacity development:** The process by which organizations develop, enhance and organise their systems, resources and knowledge; all reflected in their capacity to perform functions, solve problems and achieve objectives. Capacity Development Support can be provided in the framework of a national program, a bilateral agreement etc, and not always with a pre-defined budget, a funding source or even a timeframe.

**Development Action Plan:** Sets out how the Strategic Plan will be implemented. Indicates who will do what when. Concerned with development of the organization, rather than with the annual plan of audit work to be carried out.

**Funding source:** Refers to whether the project/programme is funded by the organization's (i.e. regional secretariat, regional committee) own budget and/or is donor funded (if donor funded, include name of donors and funding modality: e.g. bilateral funding, pooled funding or budget support).

**Impact:** Refers to the changes at organizational or broader level that can be attributed to a particular project/program or policy, both intended and unintended. E.g. increased audit coverage, increased number of audit reports produced, improved quality and timeliness of audit reports, improved Parliamentary follow up of audit reports.

**Implementing partner:** Organisation(s) supporting and executing the implementation of programs/projects based on agreements concluded by the interested parties. E.g. other SAIs, IDI, private audit firms.

**Parastatal companies/agencies:** A company/agency owned or controlled wholly or partly by the Government.

**Project activity:** Refers to activities within a support category. For example on the job training, developing new SAI legislation, improving IT infrastructure, carrying out a peer review.

**Regional organization:** Depending on the organization of your region, the term “regional organization” may in addition to regional secretariat also apply to regional committees and other groups working on specific topics, i.e. capacity building. The regional secretariat should therefore consider forwarding the questionnaire to such committees and other groups.

**SAI PMF:** Supreme Audit Institutions Performance Measurement Framework. The Pilot Version of SAI PMF is available on <http://www.idi.no/Filnedlasting.aspx?MId1=102&FilId=849>.

**Strategic Plan:** Consist of a vision, mission and values statement that establishes the strategic direction of the SAI or of the region, and determines strategic goals and objectives on how the SAI intends to achieve and consolidate its vision and fulfil its mission.

**Support services:** E.g. human resources, registry, building- and cleaning services, IT services, training function, accounts, information.

**Sustainability:** Refers to the ability of a project/program to maintain an acceptable level of benefit flows through its economic life. E.g. SAI ownership to project/programme, projects/programmes being needs based, relevance in terms of consistency with national priorities and policies.

**Timeframe:** Time interval, from (year, month) – to (year, month).

*Specific Guidance on selected questions*

6-8. Staffing

Here we would like to know the human resources of the SAI. To make sure we have a comparable number across SAIs, we ask for Full-time equivalent (FTE) which is a unit equivalent to one employee working full-time. (for example, if you have two employees working 50 %, the two employees equal 1 FTE). We are also interested in knowing how much of the total workforce who is professional/technical staff and how much is support staff. (Please make sure the sum of these two subcategories equals the total number of staff in FTE.)

9. Annual budget

Budget figures on mandated and audited entities may not be readily available to many SAIs due to complex country structures or the way budget systems are set up. We would in any case ask you to provide the information that you are able to obtain and explain the limitations as necessary.
